Government-wide Statements

The government-wide statements report information about the City as a whole using accounting methods similar to those used by private-sector companies. The statement of net position includes all of the government's assets and liabilities. All of the current year's revenues and expenses are accounted for in the statement of activities regardless of when cash is received or paid.

The two government-wide statements report the City's *net position* and how they have changed. Net position – the difference between the City's assets and deferred outflows of resources and liabilities and deferred inflows of resources – is one way to measure the City's financial health, or *position*.

- Over time, increases or decreases in the City's net position are an indicator of whether its financial health is improving or deteriorating, respectively.
- To assess the overall health of the City you need to consider additional non-financial factors such as changes in the City's property tax base and the condition of the City's capital assets.
- Over the last year, the City's net position increased by $6,809,930. City's property tax base increased by $196,717,035 during the fiscal year.

The government-wide financial statements of the City are divided into two categories:

- *Governmental activities* – Most of the City's basic services are included here, such as the police, streets, fire, library, planning, building inspection, parks, recreation departments and general administration. Property and sales taxes, charges for services, and state and federal grants finance most of these activities.
- *Business-type activities* – The City charges fees to customers to help it cover the costs of certain services it provides. The City's golf courses, water system and sewer system are included here.

Fund Financial Statements

The fund financial statements provide more detailed information about the City's funds – not the City as a whole. Funds are accounting devices that the City uses to keep track of specific sources of funding and spending for particular purposes.

- Some funds are required by State law and bond covenants.
- The City Council establishes other funds to control and manage money for particular purposes.

The City has two kinds of funds:

- *Governmental Funds* – Most of the City's basic services are included in governmental funds, which focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental funds statements provide a detailed short-term view that helps you determine whether or not there are greater or fewer financial resources that can be spent in the near future to finance the City's programs. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information on the subsequent page that explains the relationship (or differences) between them.
