Amounts reported for governmental activities in the statement of activities are different because:					
Net change in fund balances - total governmental funds				88,670	51,618
Governmental funds report capital outlay as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay exceeded depreciation in the current period.				(60,151)	(10,595)
The issuance of long-term debt (e.g. warrants) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. This amount is the effect of this difference in the treatment of long-term debt and related items.				80,581	92,450
